

Programme

5th European User
Conference for
EU-Microdata

2 – 3 March 2017
Mannheim, Germany

Organized by
German Microdata Lab, GESIS
in cooperation with Eurostat

The 5th European User Conference for EU-Microdata provides an international forum for the exchange of research based on EU-SILC, EU-LFS, AES, SES, CIS, EHIS and HBS data. An important aim of the conference is to bring together researchers working with EU-Microdata not only to encourage the discussion within the research community on both substantive and methodological issues, but also to offer researchers the opportunity to give feedback to Eurostat. The conference offers the possibility to discuss needs of the research community with Eurostat. Researchers of all disciplines who are interested either in EU-LFS, EU-SILC or other European microdata disseminated by Eurostat are encouraged to participate.

Conference sessions will focus on labour market, young adulthood, income dynamics, innovations, gender wage gap as well as on methodological topics.
