## Conference Program

---

### 7<sup>th</sup> European User Conference for EU-Microdata

March 25 – 26, 2021, virtual

Mannheim, Germany

Organized by  
German Microdata Lab, GESIS  
in cooperation with Eurostat

The 7<sup>th</sup> European User Conference for EU-Microdata provides an international forum for the exchange of research based on EU-SILC, EU-LFS, AES, CVTS; SES, CIS, EHIS and HBS data. The aim of the conference is to bring together researchers working with EU-Microdata not only to encourage the discussion within the research community on both substantive and methodological issues, but also to offer researchers the opportunity to give feedback to Eurostat. The conference offers furthermore the possibility to discuss needs of the research community with Eurostat. Researchers of all disciplines who are interested in EU-LFS, EU-SILC and/or other European microdata disseminated by Eurostat are encouraged to participate.

Topics to be addressed at the 7<sup>th</sup> European User Conference include poverty and social exclusion, income inequality, migration and labour mobility, Globalization, quality of work, energy and ecology, adult education, skills and qualification, and social aspects of health.

Due to Covid-19, the 7th European User Conference will be a virtual conference rather than an in-person event. We value the safety of each of all participants and want to ensure a safe and successful event for each of you. We look forward to seeing you in person in the future.

The conference is open to all researchers interested in EU-Microdata.

*In the breaks between the sessions, we offer Breakout Rooms for each presentation, where you can talk to the presenters in Q&A rooms or mingle with other participants at virtual conference tables.*

For any further questions please contact the local organizers of the conference Heike Wirth and Klaus Pfarr.
