

Predicting user moves between
online forum communities

Zinayida Petrushyna @ RWTH Aachen, Germany

Indicators of community/opinion switch

- Did you expect that Obama supporters would side with Trump supporters?
- Are there any significant indicators signaling that religiously active peers could become publicly dangerous?
- What are indications that political preferences are changing, especially in an extreme direction?

Evidence about peers moving between communities on the Web

→ Characterization of users that are joining and leaving Web communities + prediction of their behaviour using logistic regression models
