Abbreviations: Some questions concern the survey week and the three weeks preceding it, the intention is that the software will add dates to the questions, which is denoted in the questions as follows: dd/mm – dd/mm/yyyy. The last dd/mm/yyyy means the Sunday of the survey week.

**PIPOLO Group:**

An employee who has a job but has been away from work for more than 13 weeks (three months) for other reasons than maternity/paternity leave or own sickness, is called PIPOLO=1 group.

PIPOLO=1 if KA3=1 and T4=1,7, DNK and (L2=2, DNK or (KA4#5 and KA5#1 and (KA8A\_2013=3, DNK or KA8B=3, DNK))

- The group is classified as non-employed in results.
- Necessary data concerning job/employer are collected in connection with questions for employed persons (marked with \* before the question).

- Data concerning job-seeking is collected in connection with questions for non-employed persons.
- Not asked whether waiting for agreed job to start. In Finland this group primarily consists of persons on child care leave or job alternation leave who have intentionally withdrawn from working life. It would be strange to classify them as unemployed, even if they had found a new job during the leave that they would start once the leave has ended.

**Conscripts/performers of community service:**

In the data transmitted to Eurostat all respondents are coded as living in private households (HHTYPE=1). Afterwards Eurostat classifies conscripts on compulsory military or community service (WSTATOR=4) as living in collective households and excludes them from their results which cover persons living in private households. In our national statistics conscripts are included, they are in the group "not in the labour force".

As performing of compulsory military service/community service also overrides other activities, it is not purposeful to ask this group questions concerning employment during the survey week. Instead of interviewing conscripts, we impute some data for them and include data available from registers.

Hiring of labour means that a personnel service agency provides its own employees for its customer enterprises. The work is done with the equipment and at the premises of the customer enterprise, which also supervises the work. The personnel service agency is responsible for the remuneration, social security contributions and statutory insurance contributions of its employees.

Industry describes the activity which the establishment primarily engages in.

The information is needed as auxiliary data in the coding of industry, so must be recorded at sufficiently detailed level. To assist, the interviewee could be asked what his/her workplace produces, does, sells or manages.

For example, manufacturing of metal pipes, road construction, ladies' clothing store, staff restaurant, old people's home, hospital, comprehensive school.
