EXPLANATIONS
for the Labour Force Survey annex-module
“TRANSITION FROM WORK INTO RETIREMENT”
questionnaire filling

PREFACE

The aim of the questionnaire is to study how the transition from the labour market into retirement takes place and to find out the most important factors determining an individual’s choice upon reaching the retirement age to retire early or to continue working or to leave the labour market.

TECHNICAL NOTES

Questions from this questionnaire should be asked to individuals at their pre-retirement and retirement age who in the reporting week have reached 50 – 69 years of age. Information about the precise determination of the respondent’s age can be found in the upper part of the 1st page of the module questionnaire.

The terms individual pension or allowance mean the retirement pension or allowance that is granted to the specified individual.

At the end of the questionnaire (question 22) the time needed for filling-in the questionnaire should be indicated.

EXPLANATIONS OF SELECTED QUESTIONS

Question 7

Answer 4 “Care responsibilities” refer to cases in which the respondent is watching over/taking care of children and if he/she is taking care of sick/disabled adults.

Answer 5 “Problems related to job” should be marked in cases in which the respondent is not satisfied with:

– working schedule,
– work tasks,
– stress at work,
– degree of risk for health and safety,
– too high requirements,
– lack of the necessary skills for work
– employer’s attitude.
Answer 6 “Favourable financial arrangements to leave the work” should be marked in cases when financial conditions on the part of the employer are favourable, e.g., special bonuses/compensations that have been the main reasons for retirement or early retirement. Mark the answer also in cases when some of the early retirement schemes are fulfilled (e.g. opportunities for farmers to retire earlier).

Answer 7 “Preference to stop working other than previous codes” should be marked if work was stopped:

- for private reasons,
- for family reasons (if the respondent is taking care of someone, answer No.4 should be marked),
- because there is no necessity to work,
- because there is an opportunity to stop (discontinue) working.

Question 9

answer 1 “Yes” should be marked if the respondent will continue to work reduced working hours

answer 2 “Yes” should be marked if working hours will not be reduced and also if the respondent has worked reduced working hours in all his/her life.

Question 12

answer 1 “Yes” refers to cases in which the respondent had an opportunity to:

- reduce the number of working hours,
- change the schedule of working hours,
- to fulfil part of the work at home and send the finished material to the employer by the Internet or other means of electronic communication.

Question 15

The term “individual retirement pension” means all retirement pensions, the early retirement pension and the long service pension.

Individuals who have reached the set age and whose insurance length is not less than 10 years have a right to receive a retirement pension.

Early retirement in the period between 01.01.2000 and 01.07.2008 is possible if the individual’s length of insurance is not less than 30 years but men can retire early not sooner than at the age of 60.

Individuals with special professions whose work after some time is connected with a loss of professional skills or social danger have a right to a long service pension. The long
service pension is granted to transport workers (air force, railroad, public transport, sea and river transport) and creative workers (circus, opera, ballet etc. artists) as well as to retired militaries, workers within the system of the Ministry of the Interior with special ranks as well as to public prosecutors.

**Question 17**

**answer 2** “I do not have rights to receive individual retirement pension yet” should be marked in cases when the set age of pension is not reached yet.

**answer 3** “I do not have rights to receive individual retirement pension” should be marked in cases when the obliged pension age is reached, but the length of insurance is less than 10 years.

**Question 19**

The allowance of early retirement is paid to workers at their pre-retirement age who have joined some of the early retirement programmes. The payment of allowance is stopped with the beginning of retirement pension receipt.

**Question 20**

Receivers of the state social security allowance are individuals who do not have rights to receive the retirement pension but can be candidates for the state social security allowance to the amount of 45 lats per month.

There is a possibility that an individual may receive some allowance from the employer or fund.

As this module studies the situation in the labour market for a group of individuals at the pre-retirement and retirement age, the cases of receipt of other social allowances (e.g. state family allowance, allowance to guardian for child maintenance, state social allowance to Chernobyl NPP disaster consequence liquidation participants and their families, etc.) should be marked with the answer “No”.
