Survey. This is a survey which takes place four times a year and
which enables important information necessary to the economy and
research to be gathered on subjects related to occupational
activity and unemployment. To ensure the quality of the results, it is
crucial that all selected persons participate in the survey,
regardless of whether or not they pursue a professional activity.

What is the SLFS and what is it for?
SLFS - Swiss Labour Force Survey
- The SLFS is carried out by the Swiss Federal Statistical Office on behalf of the Federal Council.
- The SLFS provides extremely important information about the labour situation and professional activities in general. Among other things it provides answers to the following questions:
  - How many people are there in Switzerland who are employed, not employed or unemployed? How many pensioners are in paid employment?
  - How many people work in each sector? How many hours do they work?
  - How much holiday are they entitled to? How many unemployed people are not registered with a job centre? What training do they have?
- The SLFS provides important information for decision-making for politicians, research and industry.
- It is only by recognising the problems of the labour market in good time that effective measures can be taken, for example unemployed people can be helped through further training, occupational programmes and other measures, or mothers in part-time jobs can be provided with day-care centres and other possibilities for their children to be looked after.
- Labour surveys are carried out in all European countries, using the same questions.

But why me?
- Instead of questioning the whole population, which would be far too costly, it is enough to question a number of people selected at random.
- Each quarter, 32'500 persons are selected at random from a sampling frame of the FSO.
- Only ONE person per household is interviewed.
- I cannot replace you with ANYONE ELSE because that would falsify the results of the survey.
What about data protection?

- Without an absolute guarantee that the data we collect will be protected we cannot carry out any sort of survey. As a LINK interviewer I am also bound to protect all the data I collect. This means that no data from which individual people could be recognised will be passed on to third parties. And no names or addresses will be passed on to anyone else either. In order to ensure data protection your name and telephone number will be separated from your answers as soon as the interview is finished.

- The results of the survey will be collated anonymously, i.e. in percentages, such as 54% of women are in paid employment.

What type of population register is concerned?

The population register made available to the FSO exclusively contains demographical information such as age, gender, civil status or nationality. These data come from the population register of the commune of residence. The population register is updated every quarter.

Why is the population register used?

In order to simplify the SLFS interviews, the Federal Statistical Office directly takes certain data on respondents and their households from the population register. This means that we no longer need to ask these questions, thus making your job easier.

Is the FSO allowed to use these data from the population register?

YES. The use of these data and in particular the protection of data are regulated by the Federal Act of 23 June 2006 on the Harmonisation of the Register of Residents and of other Official Registers of Persons (RS 431.02).

We know that you are not in the telephone book. But the Federal Statistical Office is obliged to take account of the whole of the population. Since February 2008, a new Federal Council ordinance allows it to use all fixed-line telephone numbers in Switzerland including those that do not appear in the telephone directory.

Data protection is guaranteed by the Federal Statistics Act and the Data Protection Act:

- telephone numbers are treated in confidence
- they are used for statistical purposes only, their use for commercial or administrative purposes is absolutely out of the question and liable to prosecution.

Importance of the SLFS

- The return to the voluntary survey does not in any way call into question the importance of this survey, which has existed for over 20 years. The Federal Council has also reiterated the centrality of this survey in Switzerland’s statistical system.
- The SLFS provides indispensable indicators on employment, unemployment, working conditions, educational level, the integration of foreigners, monitoring the free movement of persons and gender equality.
Why should I bother to answer?

Your participation is important because every voice counts. You are not legally required to participate, but the FSO is counting on your cooperation.

The more people respond, the more the numbers will reflect the reality of the labour market and the variety of living conditions in Switzerland.

If a large number of people respond, the FSO will be able to provide accurate estimators.

The following questions are especially important for the survey. You may interrupt me whenever you like if something isn't clear.

Last week did you do any paid work, even if it was only for ONE HOUR, as a salaried employee, a self-employed person or an apprentice?

We are now interested in the topic of education and training and young people entering the labour market.

The following questions refer exclusively to the highest education that you have successfully completed.

During the time in which you were undertaking this education and training course, did you once work for pay, whether as an employee or self-employed?

During the time in which you were undertaking this education and training course, did you once work without pay, whether in the family business, in another company or for an association?

Was at least some of this paid work part of the curriculum?

Was at least some of this unpaid work part of the curriculum?
