STRUCTURE OF THE QUESTIONNAIRE SPECIFICATION

All questions in the specification are laid out using the same format.

Example of question layout

Some questions (for instance USUWRKM) have a main group routed to them, but subsets of this group are asked variations of the question. In such cases the main routing is at the foot of the question as usual, and the subsets are listed separately above it, with the individual aspect of the routing indented slightly from the left of the page.

The appearance of brackets in the specification usually denotes a form of text substitution (alternative question wording depending upon the respondent's earlier answers); carried out either by the BLAISE computer package or else by the interviewer, during the questionnaire. Square brackets are used in instances in which information is automatically inserted into a question by the computer package. Round brackets () are used in instances in which the interviewer may or may not wish to add something in order to assist the flow of the interview.

Over the page is a summary of the terms appearing in this right hand column, and elsewhere in the questionnaire.

All employees who have completed one year's continuous service are legally entitled to take a period of 13 weeks unpaid leave to care for children under the age of 5, or 18 weeks unpaid leave for children with disabilities who are under the age of 18. It is usually taken as a block of leave, that is, a number of weeks at a time to care for children. This type of leave is not the same as Maternity or Paternity Leave, or time off for emergencies.
