INSERT - QUESTIONS COVERING THE 'NEWDEAL' POLICY

The Labour Force Survey is one of the instruments being used to measure the Government's New Deal (for the unemployed) programme.

The nature of the introduction of this policy, in that it is being introduced for different groups over different time scales, means that the LFS has had to be flexible in its approach to measurement in this area.

The Summer (June - August) version of the questionnaire therefore included a different form of questions from the Spring (March - May) version. Furthermore, it is probable that another form may be used in the remaining versions, although at this point in time the ONS is not in possession of information as to whether further changes will be necessary or what those changes might be.

The disparity between versions occurs on P 11 (Government Training Schemes). The format included in the main body of this text is that used for the Summer questionnaire. The form used for the Spring version is shown on the reverse of this sheet.

The alterations to note are the inclusion of a separate question for newdeal respondents in the summer version and the alteration of SCH98A and ISC98A to SCH98B and ISC98B throughout the questionnaire. These changes have some effect upon routing (eg SCH98A code 5, 'Work Trial' is now switched into code 50, 'any other kind of scheme').
