Day 2 - EU-SILC
Part II Practical Training Session: Cross-sectional data structure & analyses

Exercise 5 – How to handle selected respondents

Tabulate general health across countries (PH010), and percentage of people suffering from any chronic illnesses across countries (PH020). To ensure comparability, select only persons who respond to household questionnaire (HB070).

Data sets needed
- merged data from first exercise
- I named it: merged_cross_2021.dta

Variables needed
- RB080
- RX010
- PH010
- HB070
- HB070_F

Solution steps
- Check user guide and flag vars for PH010 and PH020
